

## ANBEFALT LITTERATUR

Vedlagte liste er ment som en litteraturveiledning for kandidaten og gir en oversikt over de mest anerkjente og brukte bøkene innen hvert fagområde. Det er ikke et krav eller forventet at kandidaten skal lese alt som finnes på denne listen.

Det forventes at kandidaten kjenner til de vanligste hestesykdommene innen hvert organsystem, deres undersøkelse og behandling. Kandidaten bør sammen med veileder lage en «pensumliste» som skal leses, slik at alle relevante fagfelt er dekket.

Kandidaten bør i tillegg holde seg orientert og oppdatert om den veterinærmedisinske utviklingen gjennom aktuelle tidsskrifter, f. eks. Equine Veterinary Journal, Equine Veterinary Education og andre.

Lokale biblioteker har elektronisk tilgang til de fleste veterinærmedisinske tidsskrifter og skal kunne assistere kandidaten med tilgang til særskilte artikler og fjernlån. NMBU-Universitetsbiblioteket kan også kontaktes for hjelp med tilgang til fagartikler på [vetbibl@nmbu.no](mailto:vetbibl@nmbu.no). Review-artikler og konsensus uttalelser (slik som ACVIM consensus statement on inflammatory airway disease of horses, 2016) anbefales spesielt. Kandidaten blir også oppmuntret å bruke kritisk kildeans etter prinsipper for evidensbasert forskning.

*Det anbefales alltid de nyeste utgavene av aktuell litteratur*

### Generelt

- Knottenbelt, Hodstock & Madigan. **Equine Neonatology Medicine and Surgery**, 1st ed., 2004
- Speirs. **Clinical Examination of Horses**, 1st ed., 1997
