Anbefalinger for opprettholdelse av autorisasjon som øyelyser

DNV innfører fra og med 1. januar 2005 slike retningslinjer for vedlikeholdelse av autorisasjon som øyelyser som følger:

RECOMMENDATIONS FOR MAINTAINING APPROVAL AS NORDIC EYE PANELIST

1. *Perform 300 eye examinations during 3 years.*
2. *Attend 2 annual national eye panel meetings during 3 years. One meeting may be exchanged with the national + Nordic eye panel meetings.*
3. *Attend 2 two-day Nordic or international ophthalmology congresses or courses during 3 years. One course may be exchanged with two one-day courses arranged by a Nordic Society of Ophthalmology.*
4. *Exemption of any or all of the activities above may be granted in special circumstances.*
5. *The upper age limit for panellists follow the legal regulations for veterinary authorisation in the respective countries*
6. *Visual acuity of a certain standard is necessary to maintain approval as eye panellist.*

Eye panelists should supply their Association (DNV) with these requirements within 1st of March every third year on a standard formula. The Association (DNV) can, if necessary and if needed, demand documentation to substantiate that the information is correct. The Association (DNV) can also whenever it finds it necessary demand documentation from eye-panelist of visual acuity of a certain standard decided by NEEC in consensus and approved by the national veterinary organizations.
